### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 13 is rejected under 35 U.S.C. 102(e) as being anticipated by Noyes et al. (US 6,364,452). Noyes et al. teach a printing apparatus having a paper tray comprising a pickup roller for picking up paper stacked on the paper tray, a temperature sensor for sensing the ambient temperature in the printing apparatus, and a driving controller for driving the pickup roller according to the ambient temperature sensed by the temperature sensor. See, in particular, column 86, line 56 through column 87, line 15 and Figures 76-77.

***Allowable Subject Matter***

4. Claims 1-12 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter:

With respect to claims 1 and 10 in particular, the prior art of record fails to teach or fairly suggest a printing apparatus and method having all of the structure (or method steps) recited, in combination with and particularly including, a driving controller controlling the driving of both the feed roller and exit roller according to the ambient temperature of the printer as sensed by the temperature sensor.

With respect to claim 11, the prior art of record fails to teach or fairly suggest a method of controlling a pickup roller having all of the method steps as recited, in combination with and particularly including, driving the driving motor connected to the pickup roller of a printing apparatus according to determined rotation speeds and torques, determined according to the sensed ambient temperature of the printer.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tashiro (JP 2-171262), Nakamura (JP 62-185648), and Endo (US 5,927,703) each teach a printer with an ambient temperature

sensor and sheet feeding device having obvious similarities to the claimed subject matter.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Leslie J. Evanisko** whose telephone number is **(571) 272-2161**. The examiner can normally be reached on M-Th 7:30 am-6:00 pm.
